

2024

 unitech

You are looking for a solution provider to deliver a high-quality, reliable product coupled with responsive and proactive service, all for a fair price. For Unitech, that's just how we do business.

For over three decades, Unitech has been a global provider of data collection technologies, developing a broad range of scanning and computing devices to help businesses reach new levels of efficiency and productivity. With dedicated U.S. sales, customer service, and technical support teams, we strive to deliver technology solutions that continuously improve the way our customers work.

Focused on designing and developing products, our services and solutions anticipate a customer's changing needs. Our products can be customized with your own logo, design, and colors. This makes us stand out from the rest and provide another layer of service to our customers. The Unitech philosophy is to achieve the highest customer satisfaction through honesty, integrity, and a commitment to excellence.

Over 15 international offices
Offer a broad range of after-sales services and support

UNITECH OWN DEVELOPED SOFTWARE

MOBOLINK
 Manage Unitech mobile devices easily on one platform. Control your Unitech devices with one software program. MoboLink offers a unique way to keep tabs on devices. Turn off, restart, update, and monitor devices from your desktop. If you lose a device while on the field, you can easily deactivate it so sensitive information won't end up in the wrong hands. Certified Google application.

STAGEGO
 Configure multiple devices simply on one smart platform. Leave manual device configuration in the past with StageGO. Unitech's staging app allows you to configure multiple Unitech devices at the same time. Just enter your desired settings, scan the program's generated barcodes, and go! This free application saves you time from manually configuring each device while avoiding potentially costly errors caused by setting up devices one by one.

ELAUNCHER 2.0
 Securely lock down your devices. ELauncher replaces your default Android home screen, restricting the use of apps, notifications and settings. Even more, you can fine-tune the look and feel of the home screen, the app layouts, wallpapers, and even set out what system features to be restricted, for example, Safe Mode and Recent Keys. Just start building your ultimate productivity machines with ELauncher V2.0

Free from Unitech
 unitech Shield delivers value-added service for up-to-date support

Operating system updates are vital to an enterprise's digital safety and cyber security. While consumer devices OS updates normally end after 3 years, unitech is proud to offer, for free, extended years of security support to all models described on this page.

- All for Free & Best Coverage for Your Business**
- Free to increase our product's life cycle up to 6-8 years
 - Free OS security patches
 - Free OS upgrades on Premier products
 - Free and easy to install updates via cloud service
 - Free to optimize your device with security patches and system stability updates

unitech Shield is our promise to you to supply critical Android OS patches for three-years beyond traditional end of OS support dates. For example, Shield extends our Premier products' "shield" against known threats from 5 years to 8 years.

Operating system updates are vital to an enterprise's digital safety and cyber security. While consumer devices OS updates normally end after 3 years, unitech is proud to offer, for free, extended years of security support to all models described on this page. We guarantee to supply to you for our *GMS and *AER certified mobile devices regular free security patch updates, and then guarantee 3 more years of free critical up-to-date support. These free updates are easy to install by pulling over-the-air updates or pushing the updates via device management software such as Unitech MoboLink.

TAA COMPLIANT
 TAA refers to the Trade Agreements Act, which is a law that was passed for the purpose of making international trade more open and fair. One of the main requirements of the TAA is products purchased by the United States government can only be made in the U.S. or by a designated country such as Taiwan.

Founded in 1979 in Taiwan, Unitech is a global provider of AIDC technologies with over 40 years of experience. Our factories were built in Taiwan, and all the SMT and assembly are done in Taiwan as well. We offer a series of quality barcode scanner products to comply with the Trade Agreements Act (TAA) for U.S. government GSA (General Services Administration) Schedule contracts.

Development Tools

Unitech offers a number of SDK toolkits for developers to write apps that can interact with the unitech devices for the mobile, scanner, and the RFID product lines.

Device Management

Comparable Partner Software

Unitech Scanner Utility
 An Android application which helps users connect, configure and use a supported Unitech Bluetooth scanner.

USS
 Configure all scanner settings with friendly user interface and enable the service to make scanning data as keypad input.

USS Camera
 Capture barcode data using the device camera and send the data to your applications as keyboard inputs.

KeyRemap
 Reprogram physical buttons to act as another key or to launch an app.

WLAN Advanced
 Configure advanced WLAN settings such as power saving mode and roaming parameters.

NTP Server Settings
 Customize the NTP server setting to keep your device date and time synchronized.

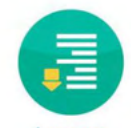

UNote
 A simple text viewer and editor for use in your work flows.

Startup
 Auto-run apps when device boots up.

TagAccess
 For versatile functions of RFID command via integrating with Unitech RFID Readers.

Logger
 An easy and fast way to get logs from a device.

Enterprise Keyboard
 Enterprise Keyboard gives various methods for user to input data to enhance efficiency and productivity.

PA768

PLEASE HANDLE WITH CARE
FRAGILE

RUGGED DEVICES

Choosing a rugged mobile device that's optimized for your business over a consumer-grade product is a smart choice. Our Android smart phones combine workplace-ready durability with a familiar interface that's easy to navigate. Don't sweat your workers dropping the device or being careless, as these computers are fit with Gorilla Glass®. They're fully sealed to protect from dust and moisture and are built to withstand rigorous handling and drops.

PA768/5G

The PA768 is Unitech's first 5G enabled rugged mobile computer, giving it the connection speeds needed to boost your efficiency to new levels. A Qualcomm Snapdragon CPU (64bits, Octa Cores up to 2.7GHz) allows the PA768 to take full advantage of 5G speeds, displaying clear visuals on its 6.3-inch screen. Android 12 OS makes the PA768 simple to use, while IP65 sealing and resistance to falls from up to 5 feet make it tough enough for any workplace. GMS and AER certified.

PA768 Gun Grip

With the simple snap-in functionality of the PA768 gun grip, you can comfortably and securely scan for the full duration of a shift. Its integrated scan engine features 32ft of reading distance, a multi-scan function, and OCR compatibility, so you'll be able to scan just about any barcode your work calls for.

PA768 Government

Unitech is thrilled to present its latest innovation, the PA768 rugged mobile computer (WLAN version), designed to provide dependable and efficient mobile computing for indoor warehousing operations. Boasting high-speed and low-latency data transfer capabilities with WLAN 6E technology, the PA768 ensures fast and reliable information access for maximum user benefit.

PA768 WiFi(6)

Unitech introduces the PA768, their inaugural WiFi-enabled rugged mobile computer, enhancing efficiency through faster connection speeds. The device utilizes a 64-bit octa-core CPU to maximize WiFi speeds, delivering clear visuals on a 6.3-inch screen. With user-friendly Android 12 OS and robust features like IP65 sealing and resistance to falls up to 5 feet, the PA768 is well-suited for diverse work environments.

PA768 FR

The PA768 is Unitech's far-range enabled rugged mobile computer, giving it the connection range needed to boost your efficiency to new levels. A Qualcomm Snapdragon CPU (64bits, Octa Cores up to 2.7GHz) allows the PA768 to take full advantage of the extended 10 meters (32.8 ft) range, displaying clear visuals on its 6.3-inch screen. Android 12 OS makes the PA768 simple to use, while IP65/IP67 sealing and resistance to falls from up to 35 feet make it tough enough for any workplace.

RG768 RFID

The RG768 boasts a user-friendly sled design integrated with UHF RFID data collection capabilities, simplifying the process of attaching the PA768 to the RG768 sled for RFID/UHF reading solutions. Equipped with a dedicated holder tailored for the PA768, inserting and securing the device is effortless. This configuration prepares the PA768 for seamless barcode and RFID/UHF reading operations.

EA520

EA630 Plus

The EA630 Plus combines all the convenience of a consumer smartphone with the utility of a dedicated scanner. This impressive device boasts an 80% screen-to-body ratio and a 6-inch, 18:9 display. Android 11 ensures ease of use while an integrated 1D/2D scanner, rugged design elements, and a removable 4000mAh battery mean that users can apply the EA630 Plus to nearly any work environment.

EA630 Plus with Gun Grip

Make long shifts more comfortable with the EA630 Plus standard gun grip. This gun grip easily attaches to the EA630 Plus Rugged Smartphone to increase scanning precision and to provide a more ergonomic experience. Improve upon the already impressive 1D/2D scanner capabilities of the EA630 Plus with this convenient accessory.

RG630 Plus RFID

Looking to expand the scanning capabilities of your EA630 Plus to include UHF RFID reading? The RG630 Plus UHF gun grip is an easy-to-use accessory that allows you to add UHF RFID potential to a device you already own. Simply slide your device into the sled, secure it, and your EA630 Plus will be able to read UHF RFID tags from up to 8 meters away at a speed of 750 tags/ second.

EA520

Unitech's EA520 pairs smartphone convenience with rugged scanning, housing an octa-core Android 11 CPU. Equipped with Bluetooth® 5, dual-band WiFi, and 4G LTE, it incorporates a 1D/2D scan engine and 13MP camera for efficient barcode scanning and image sharing.

EA520 Gun Grip

Take advantage of the EA520's integrated scanner in supreme comfort with the EA520 gun grip. Simply snap your device into the accessory and the POGO pin connection will enable you to point and shoot the scanner with ease. Improve your accuracy and reduce wrist strain with this convenient add-on. *UHF Gun Grip Available

EA520 Wearable Kit

With the EA520 wearable kit, you'll be able to keep both hands free while also keeping your EA520 easily accessible. Just slide your EA520 into the kit, then tighten the straps to secure the cushioned holder to your wrist. Ideal for warehouses, retail, and any other workplace where both hands are used frequently.

EA520 Vehicle Cradle

Keep your drivers safe while they navigate to their destinations with the EA520 vehicle cradle. The EA520's connectivity options make it a valuable tool for navigation, and this cradle keeps it visible and charging while you keep both hands on the wheel and both eyes on the road.

SL220

SL220 NEW! iOS MFi Apple Certified

Integrate your iPhone/iPad seamlessly into the workplace with SL220. This innovative sled transforms your smartphone into a smart reader specifically engineered for warehousing, retail, inventory, and asset tracking purposes. With a premier barcode reading distance of up to 10 meters, you can confidently capture barcodes from a distance.

Features

- Premier barcode reading distance: up to 10 m
- Support Pick List function to optimize work efficiency
- Support PD charging to fully charge SL220 and iPhone within 2 hours (actual charging time will vary with different iPhone models)
- IP65 dustproof, waterproof and 1.2 meters resistant to fall protection
- True Hot-swap battery design without downtime
- Easy to transform iPhone/iPad into an enterprise-grade scanner
- Lightning connection offers more reliable and convenient connection than Bluetooth pairing

SL120

The SL120 offers a distinctive solution to integrate 1D/2D barcode scanning into your iOS device workforce. This sled uniquely enhances iPhones or iPads by enabling seamless barcode scanning alongside regular functionalities, connected through Lightning for better reliability compared to Bluetooth®.

RP902 MFi iOS

The RP902 is also available in a model that has gone through Apple's strict Made For iPhone verification process, ensuring that it connects easily and safely to any iOS device. Pair the RP902 MFi with your iPhone and begin transmitting RFID data to your iPhone without a hitch.

Product	Part Number	Description

HT730

HT330

The Unitech HT330 is designed for mobile workers with one-handed data collection needs. It features an easy-to-operate, large button design with integrated barcode and RFID data collection capabilities. The HT330 uses Android 12 OS with GMS certification, and offers 3GB of RAM. This device offers a 32-key keypad with backlight and a multi-touch panel. Its 4-inch screen with IP67 rating ensures maximum durability.

HT330 with Gun Grip

Scan faster and more accurately with the HT330 gun grip. The HT330's integrated scanner makes it easy to collect data from 1D and 2D barcodes, and the POGO pins on the back of the device easily connect when snapped into the gun grip. With the HT330 gun grip, collecting data is as easy as point and shoot. Streamlining your workflow and boosting efficiency has never been more straightforward. Experience seamless integration, ergonomic design, and unparalleled convenience all in one powerful tool, revolutionizing the way you capture and manage information.

HT730/4g/WiFi

Featuring Android 10 with GMS certification (upgradeable to Android 12), this device offers a 38- or 29-key keypad and compact, ergonomic design to make all-day use more comfortable. The HT730 also boasts rugged protection, with a 6-foot drop spec and an IP67 rating. A 4-inch LCM capacitive touchscreen, 6700mAh hot-swap battery, and 2.3GHz Qualcomm Snapdragon 720G Octa-Core processor allow it to take on any workplace duty you can think of.

HT730LR Long Range

This long-range model features an expanded scanning ability of up to 65 feet (20 meters) from the host, with the same rugged design features, long-lasting battery, and high-performance internal components. Whether you're managing inventory in large warehouses or facilitating data collection in expansive environments, the HT730LR's extended range empowers you to accomplish tasks with exceptional accuracy and efficiency, even at greater distances.

HT730 Standard Gun Grip

Make your job as easy as point and shoot with the HT730 standard gun grip. This accessory adds a convenient extra grip to your device, making it more comfortable to use for longer shifts. This gun grip adds stability to your aim, so you'll be able to scan barcodes from maximum range with fewer errors. Save time and work more safely with a gun grip for your HT730. This accessory can also be used with the HT730LR.

HT730 UHF Gun Grip

Do more with your HT730 with the addition of an HT730 UHF Gun Grip. All you'll need to do is slide the device into the accessory, secure it, and you'll be ready to read RFID tags with ease. Save yourself the trouble and cost of buying a dedicated UHF reader and choose the HT730 UHF Gun Grip. Enhance your workflow by seamlessly integrating UHF RFID capabilities into a device you already trust.

RT112

RUGGED TABLETS

Enjoy speed, efficiency, and performance rolled up into perfectly slim and portable devices. Whether you're a novice or a pro, our user-friendly Android and Windows tablets help you complete your tasks faster than ever before. Customize a product based on your budget, style, and needs, and enjoy a full year warranty included at no extra cost.

RT112

RT112 is a lightweight yet rugged tablet to provide efficient and reliable Android 13 with 10.1 inch screen. Featured 5G and WLAN 6E wireless communication, it is designed for field service, warehousing, manufacturing, logistics, and transportation. Featuring Bluetooth® 5.2, wireless WLAN 6E with fast roaming, 5G connectivity for real-time data collection, and Qualcomm Snapdragon™ 5430 Octa Core Processor, 64bits, 8x CPU, up to 2.1 GHz. The RT112 delivers a seamlessly work experience and improves productivity for various applications. AER and GMS certified.

TB110

Meet the slim but tough tablet with portability for your business. Powered by a Windows 10 IoT OS, the unitech TB110 is an attractive lightweight tablet at just 780g, 13.3 mm thick for easy portability, and fortified with a tough outer casing and an environmental seal. This TB110 is one of the lightest tablets with decent performance and great durable features for retail, hospitality, healthcare and light-duty field service.

TB170 New!

Deliver the thinnest and lightest rugged tablet, TB170, to ramp up your work production. The 10.1 -inch rugged tablet is engineered to give your optimum portability to finish tasks with a comfortable digitizer at ease. Operated in Windows 11 and a faster Wi-Fi 6 connection, TB170 safeguards the scanned data stability and accuracy under the refreshed system look for every user working in manufacturing, field service, and warehousing.

TB85 Plus

Unitech has announced its next-generation Android 10 rugged tablet with an attractive, slim case for easy portability. It has an 8-inch display as offering the 450nits brightness for easy viewing in the outdoor environment, the ability to work while wearing gloves, and wet resistance. Tough with extreme multi-functions, it streamlines the workflow through a wide range of challenging industries, including field service, warehousing, and more.

TB85 Vehicle Cradle

Unleash the full potential of your scanning experience with the cutting-edge Ergonomic TB85 2D Gun Grip. Designed specifically for long-range scanning applications, this accessory elevates your productivity, accuracy, and comfort. Its advanced design minimizes hand tremors and optimizes grip stability, ensuring your scans are consistently accurate and of the highest quality.

TB170 Office Dock

Unitech has announced its next-generation Android 10 rugged tablet with an attractive, slim case for easy portability. It has an 8-inch display as offering the 450nits brightness for easy viewing in the outdoor environment, the ability to work while wearing gloves, and wet resistance. Tough with extreme multi-functions, it streamlines the workflow through a wide range of challenging industries, including field service, warehousing, and more.

RP902

RP902 UHF RFID

Unitech has announced its next-generation Android 10 rugged tablet with an attractive, slim case for easy portability. It has an 8-inch display as offering the 450nits brightness for easy viewing in the outdoor environment, the ability to work while wearing gloves, and wet resistance. Tough with extreme multi-functions, it streamlines the workflow through a wide range of challenging industries, including field service, warehousing, and more.

RS200

Two is better than one. The RS200 UHF RFID reader connects two antennas to increase UHF range in large workspaces such as warehouses. A compact form factor and capability to read up to 750 tags per second makes it an ideal choice for any need. This device is a great addition to manufacturing, self-checkout, retail, and kiosk applications and can even be utilized for drone and robot mobile inventory.

RM300

Unitech's RM300 series is a high-performance UHF RFID reader module based on Impinj R2000 chip and compliant with EPC C1 Gen2 / ISO 18000-6C and FCC modular approval requirements. System Integrators, RFID device makers could use RM300 to develop their own products with the benefits of cost-efficiency and high-performance.

Lightweight and Sturdy

Bluetooth® and with USB Support

Optimized for Multiple RFID Tags

RFID technology is well on its way to revolutionizing work environments. Don't get caught in the dust - with the RP902, you can be confident that your RFID reading devices are ready to keep you in the lead.

Contact a Unitech representative today to learn how you can demo the RP902.

RFID SOLUTIONS

RFID readers can greatly improve productivity with their ability to read multiple tags at once, so consider using our new line of RFID products to help you do more, faster,. From a pocket-sized handheld reader that can perform thousands of reads per shift to multi-port fixed reader that widens the range at your desired location, Unitech devices make your business better.

HEALTHCARE SOLUTIONS

Update your medical data collection with devices that get the job done. Whether you provide critical care services through ID bracelet scanning, specimen collection, taking patient vitals, or other tasks, Unitech healthcare devices stand ready to serve on the front lines of hospitals and care facilities. Sealed to prevent damage from dirt, dust, and water spills, these devices offer rugged protection and antimicrobial and/or disinfectant ready properties to keep staff and patients safe.

PA768 HC

Improve data collection on the front lines and beyond with a device that does much more than just scanning. Approved for use with Epic Rover applications, the PA768HC smart phone improves bedside care and patient medical data gathering. This rugged device is compact and can handle harsh cleaning agents like ethanol and isopropyl alcohol, thanks to its disinfectant ready housing.

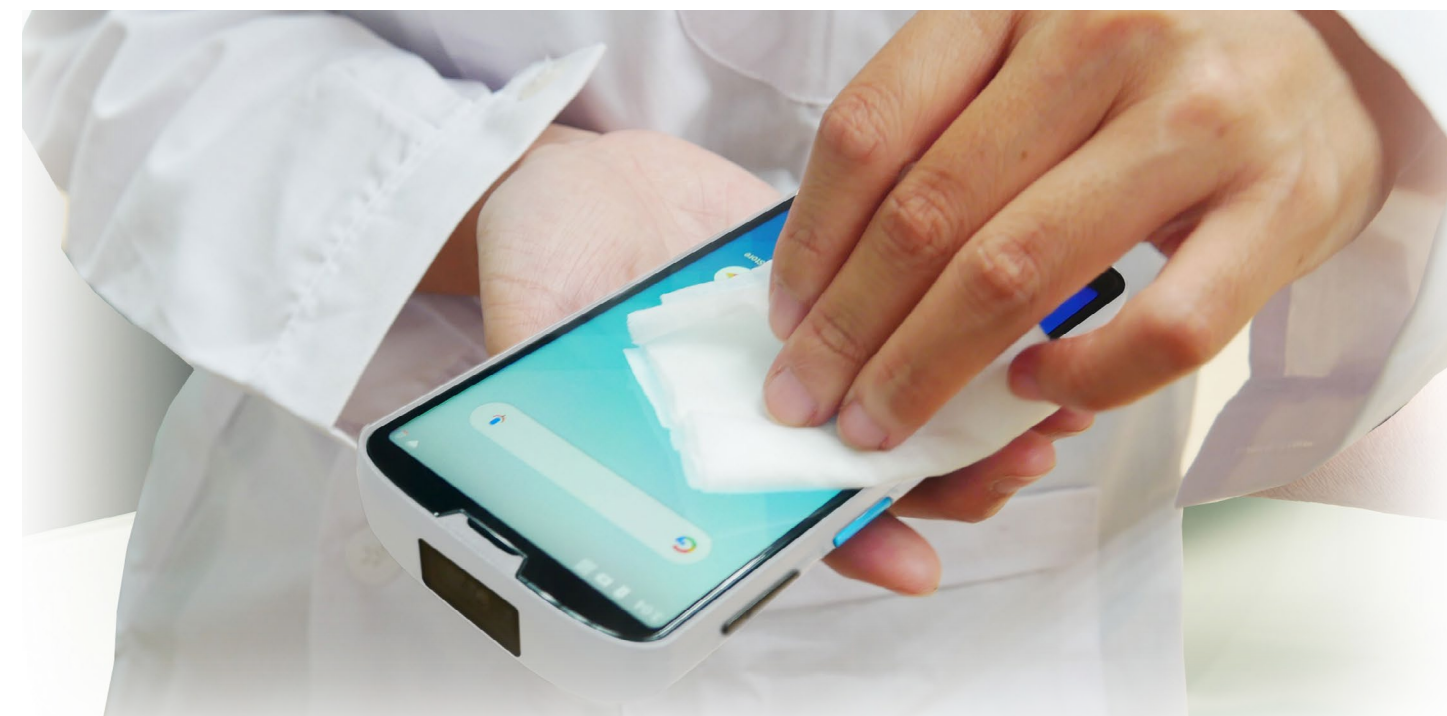

EA630 Plus HC

Expedite administrative tasks in healthcare with the EA630 Plus HC. Disinfectant ready housing, IP65 rating, and 5-foot drop protection make this device an ideal work companion. The EA630 Plus HC features integrated 1D/2D scanning, NFC read/write capability, and convenient connectivity options to provide high performance data collection. Ideal for medical ID bracelet scanning, specimen collection, and more.

MS852 Plus HC/ MS852B Plus HC

The MS852 Plus HC scanners are disinfectant ready for use with ethanol and isopropyl alcohol and are built with antimicrobial properties to deter germs and disease. A trigger lifecycle of 10 million uses and a wireless range of up to 328 feet ensures the MS852 Plus HC can be used for a variety of needs. Available in corded and wireless versions.

MS926

MS916

Take advantage of elements of a mobile computer with the form factor of a pocket scanner. The MS916 fits in the palm of your hand and boasts a unique 1-inch OLED display. Scan any 1D barcode at up to 104 scans per second. The 2MB of onboard memory can store up to 100,000 scans. The MS916 charges quickly over USB-C and operates for up to 5 hours at a time.

MS926

The MS926 features all the convenient attributes of the MS916 but is capable of scanning both 1D and 2D barcodes. With up to 30ft of communication range and 2MB of onboard memory for out of range scanning, you can take the MS926 wherever your scanning requirements take you. Optional accessories like single-slot and 5-slot cradles are great for outfitting your entire team with these handy scanners. Charges quickly over USB-C.

MS912 Plus

The MS912 Plus is ideal for high volume barcode scanning; this device can perform up to 5,000 scans per charge. This upgrade to the MS912 is easily paired with a smart phone, tablet, or computer for seamless data collection. This slim device offers 2MB of memory and you can hang it on a lanyard or belt loop to take it wherever you go. Charges quickly over USB-C.

COMPANION SCANNERS

Our pocket-sized wireless scanners are the perfect companion for your smartphone or tablet. With your choice of scan engine (1D/2D) and onboard memory (up to 32 MB), Unitech pocket scanners place powerful data collection in the palm of your hand. All our companion scanners are iOS, Android, and Windows compatible, and pair quickly and easily to any Bluetooth device.

MS822B

WIRELESS SCANNERS

Our wireless scanners are designed to take a licking and keep on ticking. Unitech barcode scanners offer a wide range of cordless movement. Built with exceptional battery life and easy Bluetooth pairing options, these scanners are perfect for medium to high-volume scanning needs. Once your scanning tasks are done, simply charge them in the provided charging cradles.

MS822B NEW!

Utilizing a megapixel 2D barcode scanning engine and the freedom of wireless technology, the MS822B offers highly accurate performance and affordable price for the demands of a wide range of market applications, such as point-of-sale, loyalty, coupons checking, personal data identification, inventory control, and field service sectors.

MS852 Plus ESD/ESDMS852B Plus

Special manufacturing techniques ensure that antistatic properties are continuously added every time the device is wiped. This 1D/2D barcode scanner is capable of withstanding up to 105~109 ohms per square and is chlorine free. The MS852B Plus features Bluetooth® connectivity. Direct Parts Marking (DPM) capable models are also available.

MS851/MS851B

Scan freely using Unitech's MS851B and MS851B Bluetooth® enabled scanners. Choose the MS852B and enjoy the versatility of wireless 1D and 2D scanning. Both the MS851B and MS852B feature a wireless transmission range of up to 328 feet and batteries that provide up to 25 hours of use, all packaged with a charging cradle to keep your employees operating efficiently. Wired and ESD versions of these devices are also available.

MS852P

The MS852P is packaged with a unique USB dongle to allow specific wireless connectivity without the need for Bluetooth®. A slim form factor and ergonomic grip combined with a rugged IP42 rating and 6.8-foot drop spec makes this device a powerful ally in the workplace. A long battery life of up to 25 hours, 328-foot wireless transmission range, and ability to read 1D and 2D barcodes makes this scanner suitable for logistics, inventory management, and warehousing applications.

MS852 Plus/MS852B Plus

Delivering superior performance in a slim-designed ergonomic body, the MS852 Plus barcode scanner reads all 1D and 2D barcodes with speed and accuracy. The MS852 Plus can be set to automatically populate electronic forms in a single scan from driver's licenses or ID cards (additional software required). The MS852 Plus is durable and ideal for retail POS, event ticketing, and manufacturing environments. The MS852B Plus features convenient Bluetooth® wireless.

MS852 LR/MS852B LR

Increase productivity with the MS852 LR series. Scan barcodes near and far with these long-range devices that read up to 68 feet away including a wireless range of up to 328 feet for the MS852B LR. An IP42 environmental seal and 6-foot drop rating offers rugged protection. Superior motion tolerance and the ability to read 1D and 2D barcodes along with a long life cycle of up to 10 million uses adds to the value of the MS852 LR series.

WD200

WEARABLE SOLUTIONS

Take your work with you with data collection devices that deliver high-performance scanning and rugged efficiency. Unitech wearable devices fit multiple configurations to suit any scanning need. Wear on wrists, fingers, necks, or on belt loops to reduce fatigue and eliminate strain on hands. Experience sheer power and productivity with wearables that do more.

WD200

WD200 features a powerful Qualcomm® 660 2.2GHz Octa-Core processor. Get your essential work done faster with the user-friendliness of Android 10 OS + GMS. Experience heightened device performance with a 2.2GHz Octa-Core processor and ease of use with a wearable that fits wrists, necks, and belt loops. A 3.1-inch touchscreen offers easy viewing while the USB-C port allows you to directly connect to the MS622 2D scanner for convenience and reliability.

MS626

Accelerate data collection tasks with a wearable device that allows hands-free usage and freedom to move. Capable of scanning 1D and 2D barcodes and weighing .77 oz, the MS622 can read printed or digital codes from smart phones and computer screens. Users can switch from left- or right-handed use as well as operate the scanner with gloves. Connect to the WD200 mobile computer to streamline work processes. USB-C tethered version also available, as the MS622.

SP320

The Unitech SP320 mobile printer provides seamless integration with your existing Unitech mobile solutions, iOS, and Android devices. Advanced printing performance at the speed of 90mm/s, allows workers to handle a great variety of receipt and label printing applications while on the go. Print barcode labels up to 3 inches wide. Supports Bluetooth® 5.0 and USB compatibility. High Capacity & Long Lasting 2700mAh battery.

MS652 Plus

The MS652 Plus two-finger ring scanner features wearable design that gives you freedom of movement to perform barcode scanning tasks comfortably while keeping both hands free. The MS652 Plus is designed to streamline the workflow for a wide range of applications such as retail, logistics, field service, and hospitality. Outfit your entire team and charge your devices all at once with the convenient 5-slot charging cradle.

MS622

The MS622 is a supremely convenient single finger wearable scanner that combines powerful 2D scanning performance with a lightweight, hands-free form factor. This wired wearable scanner is designed to be used with the Unitech WD200 Wearable Mobile Computer. The included USB-C cable easily connects the MS622 to the WD200, causing no need to fuss with Bluetooth pairing so your employees can get right to scanning, completely hands-free!

MS633

MS633-LR wearable scanner can help you! It can easily capture 1D and 2D barcodes in at a variety of distance and light conditions with adjustable illumination and intelligent autofocus. It integrates dual-mode Bluetooth 4.0 technology with iOS, Android and Windows, which significantly increases productivity and reduces error rates. It also features NFC, vibration alerts, AI identifier recognition, real-time transmission and batch data offline upload. It is quite suitable for a variety of applications, from warehouse to front-of-store.

MS838B

3-in-1

GENERAL PURPOSE SCANNERS

Take your work with you with data collection devices that deliver high-performance scanning and rugged efficiency. Unitech wearable devices fit multiple configurations to suit any scanning need. Wear on wrists, fingers, necks, or on belt loops to reduce fatigue and eliminate strain on hands. Experience sheer power and productivity with wearables that do more.

AS10

If you only need the basics, don't look any further than the AS10 barcode scanner. The AS10 barcode scanner is an affordable option for streamlining your data collection. Easy to use and configure, this bestseller makes the barcode scanning process as hassle-free as can be. Experience efficient scanning performance without breaking the bank.

MS836/MS836B 3-in-1

Rely on the MS836 for robust barcode scanning that delivers efficiency and ease throughout your day. With a 300 scans per second rate and $\pm 30^\circ$ skew allowance, this durable scanner suits heavy-duty needs. Built to withstand, it boasts a 5-foot drop spec and IP42 dust- and water-proofing. Adapt to any scenario with trigger, presentation, and auto-sensing modes. Opt for the MS836B model for added versatility, featuring Bluetooth®, wired, and 2.4GHz USB dongle options for dedicated wireless connection.

MS838

Delivering reliable performance at an affordable price, the MS838 2D imager scanner offers excellent readability for increased productivity even with damaged or poorly printed barcodes. This cost-effective and reliable handheld scanner provides an optimal combination of performance making it an ideal scanning tool for a wide range of market applications, such as point-of-sale, personal data identification and inventory control.

MS250

The MS250 is a cost-effective CCD scanner, making it an ideal scanning tool for a wide range of market applications, such as point-of-sale, document processing, personal data identification, and inventory control. Its ergonomic design and efficient scanning capabilities ensure smooth operations across various industries, enhancing productivity and accuracy in every task.

MS282E

A compact, attractive, and unique 2D handheld scanner, the MS282E offers customizable top casings to fit your business style. Its linear barcode scanning technology works for a wide range of markets and applications, from point-of-sale systems, loyalty card and mobile coupons in retail stores to general purpose hospitality scanning. Choose our white or black casings, or customize to fit your style exactly.

MS838B 3-in-1

The MS838B wireless 2D imager scanner provides reliable functionality at an affordable price, combining exceptional 1D and 2D barcode scanning with wireless flexibility. With wired, Bluetooth, or 2.4G wireless connectivity options, its unique design accommodates various preferences. This cost-effective handheld scanner offers top-notch performance, making it an ideal choice for tasks such as point-of-sale, personal data verification, and inventory management.

TS100

PRESENTATION SCANNERS

Presentation scanners offer high performance scanning - speedily and accurately. The device's stationary position allows more accurate data collection and hands-free scanning. Easily scan barcodes on paper or electronic barcodes from a smart phone or tablet. All of our scanners are constructed with sturdy materials and designed to handle your toughest workload.

TS100

For efficient tabletop barcode scanning with a small price, go for the Unitech TS100. Designed for small spaces, the TS100's compact design reduces its impact on the environment and reduces workloads making it an ideal all-around data collection tool. The TS100 reads 1D and 2D barcodes and is a great addition to retail, food service, and event ticketing industries.

TS200 NEW!

The TS200 is a lightweight, space saver perfect for small corners and counters. Ideal for retail, event ticketing, and food service applications. Large scanning window means a wider read range and more scan accuracy. Scans all common 2D barcodes, Passport MRZ as well as mDLs. Uses a USB connection for flexible power options.

FC75

The FC75 hands-free 2D imager mounts easily behind the counter or onto an existing POS system. The FC75's scan trigger can also be used for on-demand scanning. Reads printed and digital barcodes. 4-foot drop rating. Optional hands-free stand. Backed by a 3-year warranty.

MS246

MAGNETIC STRIPE READERS

An ideal option for small businesses or entrepreneurs: an affordable credit card reader with great performance and excellent data encryption. Unitech magnetic stripe readers are the easiest way to obtain card data. A simple swipe, and you'll be capturing up to three tracks of data quickly and accurately. These readers are quick to mount on any flat surface, so installing an MSR reader is easy!

MS246

The Unitech MS246 magnetic stripe reader is the easiest way to obtain your card data. Simple enough to be used with just minimal training, this handy and compact data collection solution can integrate into any retail store, library, or even a gym. Reliable for up to 1,000,000 card swipes, and backed by a 2-year warranty.

MS146

The MS146 barcode card reader is designed for time and attendance, security, and access control applications that use badges, cards, or forms. Secured by black panels to prevent photocopying, the MS146 is versatile and capable of adapting to many different interface options.

MSR206

The MSR206 Manual Swipe Magnetic Card Reader/Writer is designed to offer a card reading/writing solution for ISO 7811-6 formats. The MSR206 reads and writes up to 3 tracks of data, e.g. decoding/encoding and verifying up to 3 tracks of data simultaneously. Includes programmable leading bit, raw data, DMV/AAMVA, and user defined format. Backed by a 1-year warranty.

MS100

Accurate and efficient, the MS100 is budget-friendly, yet powerful enough to meet a wide variety of data entry needs. A versatile scan reader that can read all common 1D barcodes, the MS100 is able to read codes at a wide-read angle and has a low power consumption.

MS120

With the MS120, you'll get seamless, easy barcode scanning. This wand barcode scanner reads any linear barcode (1D), even damaged or faded barcodes. An extremely cost-effective solution, the MS120 offers even more value than your average wand barcode scanner thanks to its replaceable tip.
