

# USU Setup and Using Guide, Unitech Scanner Utility for MS652

1. Download the app Unitech Scanner Utility “USU” from <https://www.ute.com/en/products/detail/61>.
2. Install Unitech Scanner Utility on your Android device. After installing, run the app. If needed, tap the application Unitech Scanner Utility “USU”.

3. Follow these steps:

Tap ALLOW	Tap ALLOW	Turn on Unitech SU Keyboard
		

4. Follow these steps:

Tap OK	Tap OK. Then press Back to go back to USU.	Change the keyboard to Unitech SU Keyboard
		

- The prompt shown below appears on Android 8 or greater devices. Follow these steps:

<p>Tap on "click here". The Android settings will open for you to see the Bluetooth address.</p>	<p>Type in the Bluetooth MAC address and tap OK. The screen shot below shows using the split screen feature in Android 8 and 9.</p>

- On the MS652+, turn it on by holding the scan button a few seconds.
- Use the ring scanner to scan the barcode generated by USU.

- 8. You will see, likely, the question to Pair with MS652. Tap PAIR. You will be completely paired when the ring scanner light is solid blue.

- 9. Tap Menu

- 10. Tap Scanner Information

- 11. Scroll down so you can see the blank rectangle box. Scan a barcode from a product and you will see it appear in the rectangle box. From now on your scanned data will appear in any app where the blinking cursor is.

*Note that if you need to switch to a different keyboard until you are ready to scan again, some devices will have a keyboard icon in the bottom right of the screen to tap, and others will have a “Change Keyboard” option in the drop down notification shade.*
