

Enhancing Warehouse Efficiency with the Latest MFi-Certified iOS Solutions

Industry

E-commerce Solutions Provider

Application

Warehouse Operations

Product

SL220

Case Description

A leading global print-on-demand and fulfillment company empowers e-commerce businesses by providing custom printing, warehousing, and shipping services.

Challenge

Our client previously used iPod Touch devices paired with third-party iOS sleds to manage their warehouse operations, including stock placement, overstock management, production picking, and multi-item order sorting. However, with Apple discontinuing the iPod Touch and the sled manufacturer halting production, they faced an urgent need for a replacement solution. They needed to find a device that could seamlessly integrate with their system while meeting the demands of their warehouse workflows—requiring tools that are both reliable and efficient.

Solution / Reasons to Choose Unitech SL220 iOS Sled Scanner

The Unitech SL220 provided the perfect solution to the client’s challenges, offering features that set it apart in the market:

- **Apple MFi-Certified Solution:** Unitech offered one of the latest rugged iOS barcode scanning solutions, certified by Apple MFi, to seamlessly meet their operational needs.
- **Seamless Software Integration:** The SL220 easily integrates with the client’s proprietary software, ensuring smooth and efficient operations.
- **Extended Scanning Range:** Combined with iOS devices, the SL220 supports a scanning distance of up to 10 meters, significantly enhancing productivity in warehouse workflows.
- **Rugged and Ergonomic Design:** Built to withstand the rigors of warehouse environments, the SL220 combines durability and lightweight design with features including IP65 dustproof, waterproof and 1.2 meters resistant to fall protection.

Benefits for Clients

- **Certified iOS Solution with TAA Compliance:** The SL220 iOS Sled Scanner is fully made in Taiwan to meet TAA and global standards, offering secure and reliable performance for government and enterprise workflows.
- **Easy operation and a seamless conversion process:** Support both Lightning and USB-C connectors, the SL220 transforms iPhones and iPads into enterprise-grade barcode scanners, delivering unmatched flexibility and adaptability for business applications.
- **Effortless SDK Access for Developers:** Instantly download the complete iOS scanner SDK with no forms or approvals required, saving time and simplifying integration for a seamless development experience.
- **Unitech ScanBridge Technology:** Download ScanBridge from the App Store to enable the ScanBridge Keyboard, the SL220 allows seamless integration with third-party software as a general keyboard.
